Social, Teacher-Guided, Device-enabled Learning Experiences — Face-to-Face or Remote

Ensure quality and engagement, regardless of instructional use case.

Curriculum bundles containing 800+ standards-based lessons

Courses with playlists of social 5E-model learning experiences

Teacher-guided and device-enabled for seamless face-to-face and remote instruction

Engagement • Achievement • Visibility

Remarkable Student Engagement, and a Program that Helps Teachers Achieve Student-Centered Learning

With Exploros, all students participate using social media skills. Students develop graphic organizers, make predictions, analyze images and texts, develop tables and sketches, write short responses, take polls, and more. In short, students shape the classroom learning experience through peer interaction on learning standards based topics presented in a 5E-model experience. No student is a bystander, because in order to see what others are posting, one has to participate.

Teachers gain real-time insight into student and class understanding, and can address misconceptions or difficult concepts accordingly. Classroom dialog is enriched, because all students are engaged, teachers can see class perceptions, and they have teacher notes embedded within the curriculum to help guide discussion. Since the Exploros program guides the learning experience, teachers have more time for class and student personalization.

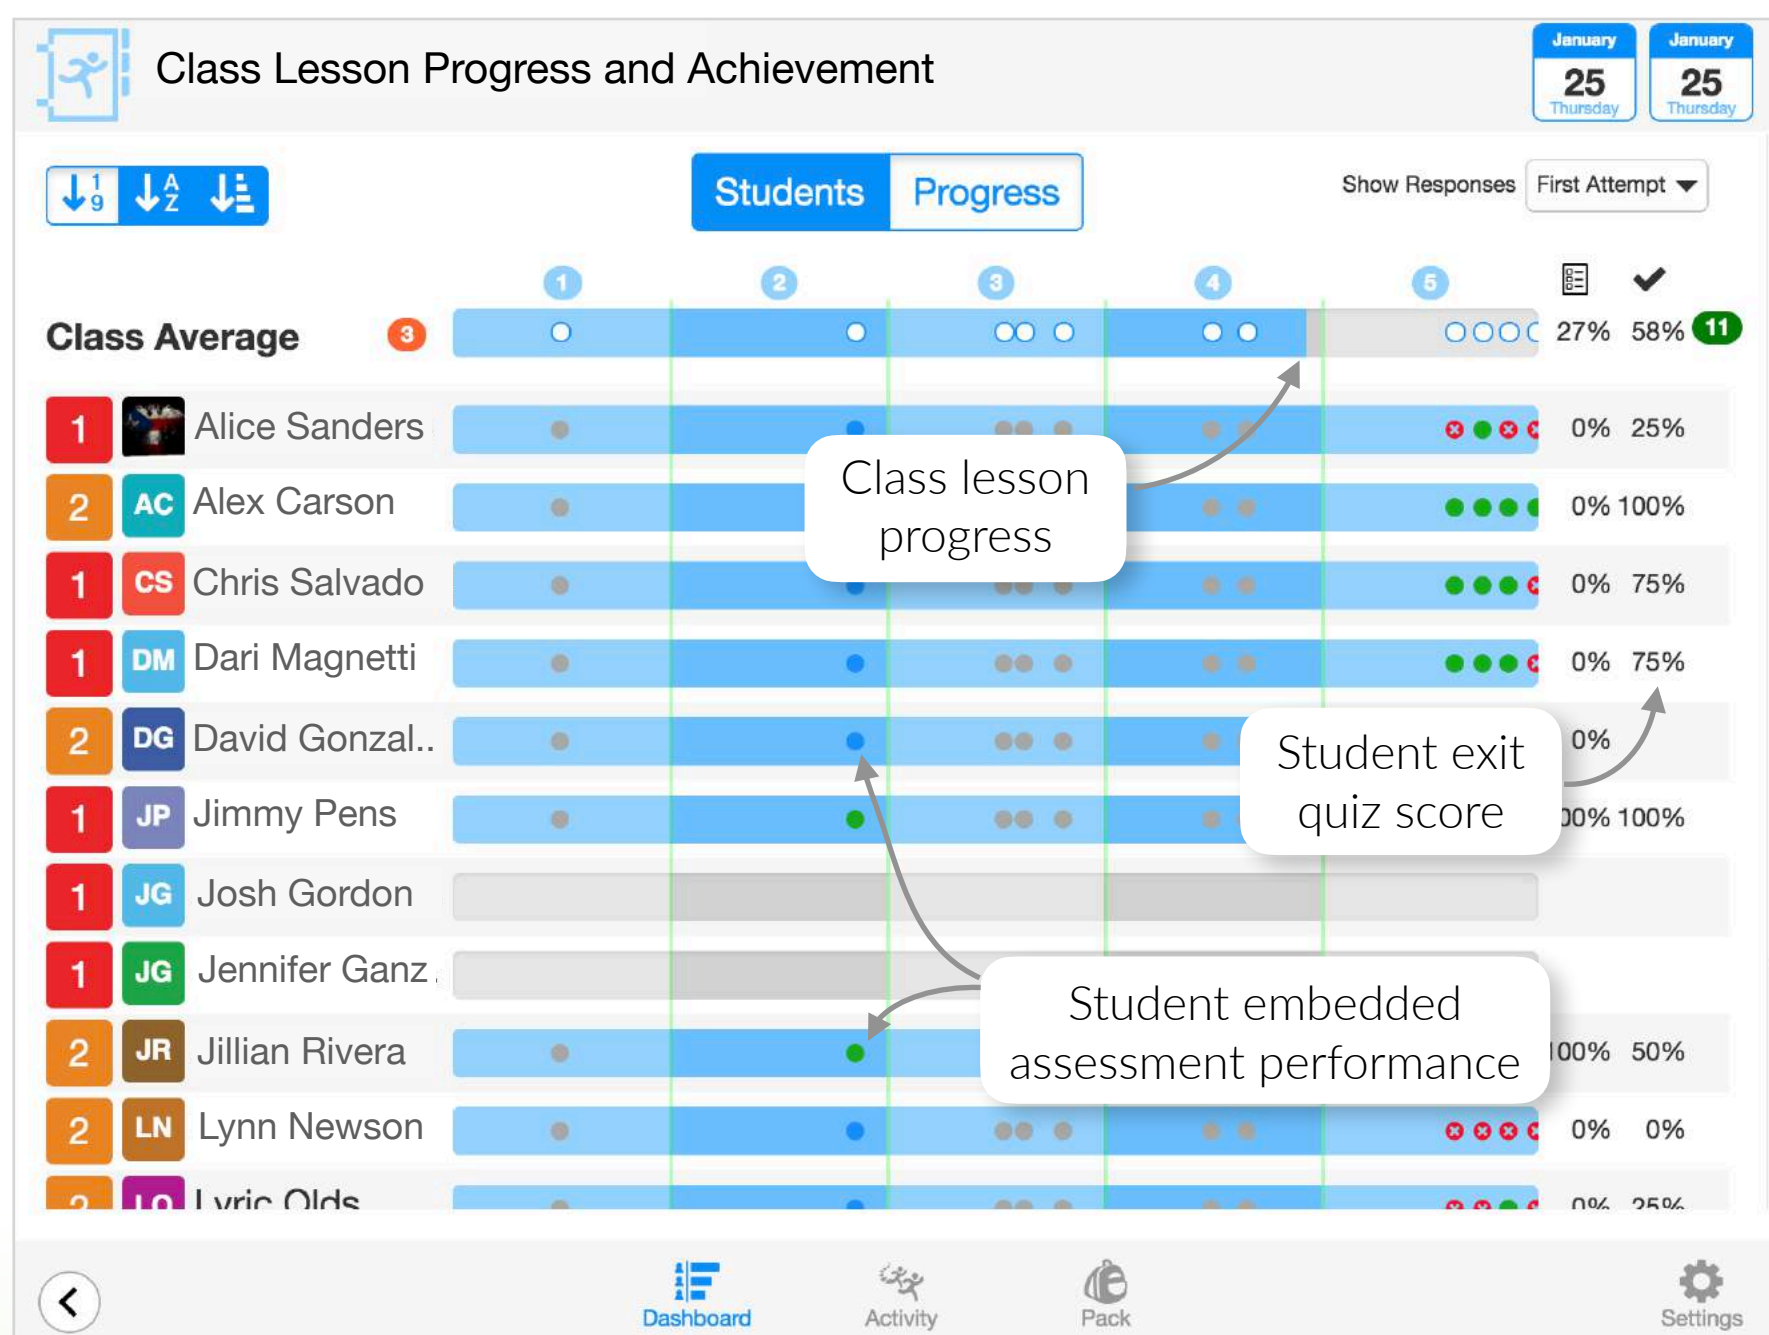

bravery brave smart wise stern
responsibility respect confidence takes actions
courageous honesty courage
integrity and hard worker independent strong power hungry bold leadership
strong and is a good person military leaders friendliness
intelligent smart. consistency passion
selfless and navigator fearless focus
works with them

Using a prompt embedded within a lesson, students brainstorm characteristics of a leader

Engagement • Achievement • Visibility

Reteach in Real Time - Data Driven Instruction

With the Exploros Program, a teacher can see in real time how students comprehend lesson objectives, and then address any misconceptions or extend understanding in real time. This shortened feedback loop is fundamental to personalizing the learning experience and improving instruction.

Teachers can toggle between the lesson plan and the responses dashboard to see student progress, and achievement. If students are struggling with a concept, it can be addressed in real time.

Engagement • Achievement • Visibility

Language Supports - Differentiated Passages, Translation, Read Aloud

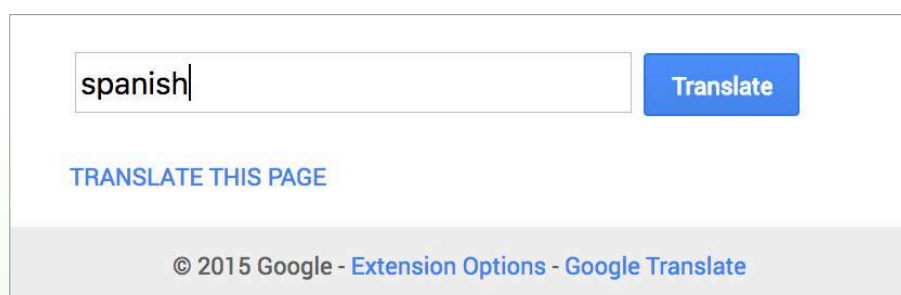

Learning experiences include reading passages. Some experiences include summaries of the passages, and the teacher can assign each student to a reading group—one group receives the full passage and the other group receives the summary. Every summary includes a link to the full passage.

Differentiated reading passages - summary articles and full articles

Students who need extra support may use the browser's text-to-speech feature to read aloud any portion of the passage or the experience. Students using Chrome can utilize Google Translate to automatically translate the screen into numerous languages.

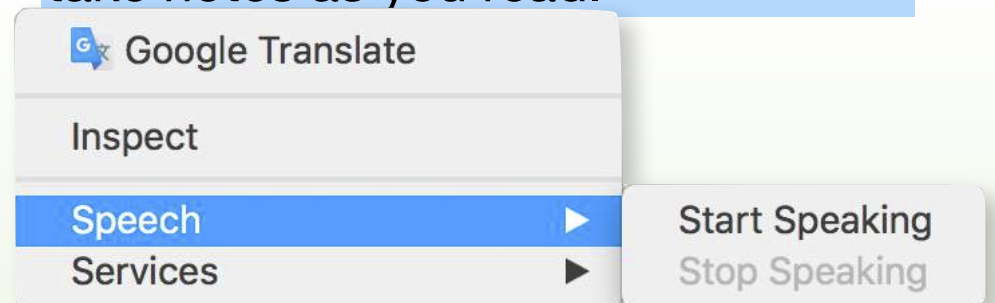

Translation

All lessons, including articles and student responses, can be translated into over 100 languages and read aloud

Read Aloud

Use the graphic organizer below to take notes as you read.

Unprecedented Instructional Improvement Opportunity with Exploros Classroom Analytics

As students participate in device-enabled learning experiences and teachers guide social classroom learning, Exploros *automatically* collects curriculum progress and achievement data at the student, class, campus and district level. Teachers can reteach difficult topics instantly, and each class and campus has meaningful data for targeted instructional improvement, student achievement, and state testing preparation.

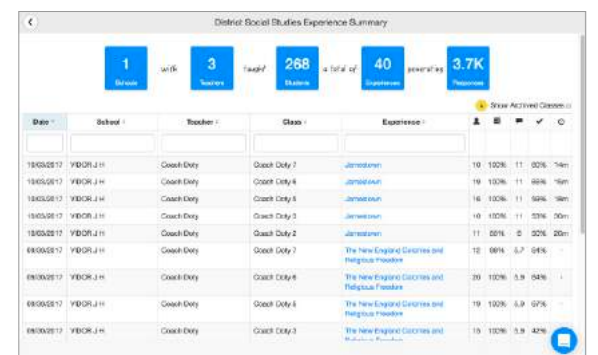

No other program offers this level of classroom instruction analytics.

Classroom data-driven instruction dashboards

Learning standards and other analytics

Administrator analytics for every campus and class

Learning Standards Mapping

In every lesson, readings, images, videos and student responses are mapped to learning standards*. As student use the program, their standards-based progress is automatically tracked in a portfolio for student, teacher, and administrator use.

The screenshot shows a lesson titled 'Drafting and Signing the Constitution'. It includes a description: 'Students learn about the first stages of the U.S. Constitution—the debates behind the drafting and signing of this document. They'll discover when and why this document was written, the two main plans that were...'. Below the description, a row of buttons lists the mapped standards: 8.1.A, 8.1.C, 8.4.B, 8.4.D, 8.21.C, 8.22.B, and 8.29.B. A 'Reading groups' button is also visible. The bottom section details the specific standards being analyzed: 8.4.D (i) analyze the issues of the Constitutional Convention of 1787, including the Great Compromise and 8.4.D (ii) analyze the issues of the Constitutional Convention of 1787, including the Three-Fifths Compromise.

Every learning experience is mapped to learning standards*

* Standards-based mapping is not available in all states. Ask for details.

Over 600 Device-Enabled Learning Experiences for Grades 5-12

Teaching social studies in the device-enabled classroom has never been more engaging and impactful. Engage students with over 600 learning experiences (digital lessons) in World Cultures, U.S. History, World History, Civics, and other courses.

Each full-year course is organized into units. Each unit contains a series of teacher-guided 5E Model learning experiences that take about one class period to teach.

Full-year courses contain units of classroom learning experiences. Each experience is a teacher-guided 5E-model lesson that has a digital teacher and student interface.

Harness the Power of Student Devices

Course playlists of standards-based 5E Model lessons enable social, teacher-guided learning experiences. Exploros automatically displays live progress data and produces Classroom Analytics for data-driven instruction.

All Students Have a Voice Using Social Media Skills

With the Exploros E.L.A. Program, every student is an active learner, participating during class using social media skills. Students share graphic organizers, drawings, short essays, and many other forms of responses. This student voice increases each student's engagement and is foundational in lifelong social emotional skills.

Teachers see student posts in realtime, and can use this input to guide classroom dialogue and pace the learning experience. The Exploros platform automatically measures each students learning progress, for more personalized instruction.

Reading

Students research, analyze, and in this example, make predictions. Peer interaction increases interest and sets the stage for learning.

Engagement and Social Emotion Learning

Now try being an active reader while you read "The Crow and the Pitcher," one of Aesop's fables. First, preview the text and **make a prediction** what the story is about.

Buddy Carsen 09/18/2018

A crow struggles to get water out of a pitcher.

Mila Sanchez 09/18/2018

The thirsty crow searches for a solution.

Justin Gleason 09/18/2018

Determination pays off!

Use as Core, or Compliment Existing ELA

Exploros ELA can be used as a stand-alone program or as a seamless compliment to many ELA instructional approaches. Teachers benefit from ready-to-teach learning experiences with the flexibility to adapt to specific classroom and student needs.

Each Exploros ELA learning experience is a combination of activities that immerse students in guided, collaborative, and individual activities to develop essential skills.

Guided, Collaborative, and Independent Work

Each learning experience is a self-contained lesson that includes guided, collaborative and independent work. Students develop critical skills through combinations of teacher-guided mini-lessons, small group work, and various reading, writing, listening, and speaking activities. Learning experiences range in length from one class period to a full week.

The content delivery experiences (e.g., Analyzing Character, Figurative Language, etc.) use short excerpts or longer passages for teaching the concepts. Then, each student applies the concept to a self-selected text or to a short writing exercise.

Reading, Writing, Listening, Speaking, and Critical Thinking

Each experience engages students in reading (assigned and self-selected texts, and the experience text itself); writing (from text responses to essays to genre/craft-based exercises, often reflective writing); listening and speaking (class and small group discussion); and thinking (formative assessment and discussions throughout).

Four Main Types of Learning Experiences

1. Content delivery (genres, craft concepts, etc.), generally with reading passages
2. Writing projects, e.g., writing an informational text
3. Presentations, e.g., a debate or oral presentation
4. Skills practice (using a dictionary, following directions, etc.)

Standards-Based with Test Preparation

Student interactions are mapped to learning standards for real-time progress monitoring. Most learning experiences end with 3-5 exit questions that mimic state testing approaches.

Language Supports - Translation, Read-Aloud

Student collaboration within Exploros offers built-in peer-to-peer language support, but all texts can be read-aloud or translated using browser-based extensions.

Powerful ELA for Grades 4-8

Teaching English Language Arts and Reading in the device-enabled classroom has never been more engaging and impactful. Our standards-aligned learning experiences (digital lessons) help students develop essential skills through active learning.

Each full-year course is organized into units. Each unit contains a series of teacher-guided 5E Model learning experiences that take 1-2 class periods to teach.

Full-year courses contain units of classroom learning experiences. Each experience is a teacher-guided 5E-model lesson that has a digital teacher and student interface.

Each Course Contains 7 Units

Foundational Skills

Students learn basic classroom language skills, such as following instructions, using a dictionary, and building vocabulary.

Literary Genres

Students learn about literary elements, such as plot and characters, across a number of literary genres. They also do some creative writing.

Non-fiction Texts

Students learn reading comprehension skills, such as finding the main idea and summarizing text, and apply these skills to informational and argumentative texts. They also develop writing and speaking skills.

Author's Craft

Students examine how authors use language by examining purpose, figurative language, voice, and more.

Personal Narrative

Students read, write, and present personal narratives, practicing skills they have learned in other units.

The Writing Process

Students focus on the different steps of the writing process.

Inquiry & Research

Students learn research skills, such as finding information and evaluating sources.

Google for Education

Technology and Cloud Partner. Exploras E.L.A.R. is integrated with Google Classroom, Google Drive, and Google Docs.

A Closer Look at the ELA Grade 4 Course

Each course is a complete English Language Arts and Reading program with emphasis on reading, writing, listening, and speaking skills. The course simplifies the transition to student-centered learning – students use social media skills to actively engage, and teachers guide the learning with real-time insights.

Each course contains seven units, which contain 45 learning experiences in total. Make your own class playlist from the full course library.

Guided, Collaborative, and Independent Work

Each learning experience is a self-contained, standards-aligned, 5E-Model lesson that includes guided, collaborative and independent work. Learning experiences range in length from one class period to a full week.

The content delivery experiences (e.g., Analyzing Character, Figurative Language, etc.) use short excerpts or longer passages for teaching the concepts. Then, each student applies the concept to a self-selected text or to a short writing exercise.

Listening, Speaking, Reading, Writing, and Thinking

Each experience engages students in listening and speaking (class and small group discussion), reading (assigned and self-selected texts, and the experience text itself), writing (from text responses to essays to genre/craft-based exercises, often reflective writing), and thinking (formative assessment and discussions throughout).

Four Main Types of Learning Experiences

1. Content delivery (genres, craft concepts, etc.), generally with reading passages
2. Writing projects, e.g., writing an informational text
3. Presentations, e.g., a debate or oral presentation
4. Skills practice (using a dictionary, following directions, etc.)

Book Reports

The program includes two book report experiences, one for fiction and one for non-fiction. They can be used multiple times throughout the year. The reports can be for self-selected or assigned texts. Each book report ends with a recommendation to classmates as a means of generating student interest in independent reading.

Language Supports - Translation, Read-Aloud

Student collaboration within Exploros offers built-in peer-to-peer language support, but all texts can be read-aloud or translated using browser-based extensions.

4th Grade Learning Experience List

1. Following and Giving Instructions
2. Look It Up!
3. Using Context for Meaning
4. Prefixes and Suffixes
5. Building Your Vocabulary
6. Word Play

7. Let's Read a Story
8. What's the Story About?
9. Different Types of Stories
10. Analyzing Characters
11. Analyzing Plot Elements
12. Analyzing the Setting

13. Point of View
14. Reading Poetry
15. Drama: Enacting Literature
16. Book Report: Fiction
17. Let's Read an Article
18. Understanding What You Read

19. What's the Main Idea?
20. Summarizing Text
21. Reading Informational Text
22. Writing Informational Text
23. Reading Argumentative Text
24. Writing Argumentative Text

25. Let's Have a Debate
26. Writing a Formal Letter
27. Book Report (Non-fiction)
28. What Is the Author Trying to Say?
29. Using Figurative Language
30. Author's Voice

31. Anecdotes
32. Making Connections to Text
33. Reading Personal Narratives
34. Writing a Personal Narrative
35. Presenting an Opinion
36. The Writing Process

37. Revising Your Work
38. Capitalization and Punctuation
39. Spelling Tricks
40. Editing Your Work
41. Writing for Assessment
42. Generating Inquiry Questions
43. Finding Information
44. Primary and Secondary Sources
45. In Your Own Words
